PROFESSIONAL SUMMARY

Corporate professional with 13+ years of experience across customer service, quality, user acceptance testing, product support, project coordination, and technology-related functions. Experienced in documentation, research, reporting, task tracking, stakeholder communication, data organization, process support, and information validation.

Experienced working with business stakeholders, technical teams, and end users to gather information, clarify requirements, track activities, document findings, and communicate results. Comfortable learning new systems and using digital and AI tools to improve productivity and workflow efficiency.

CORE SKILLS

Administrative Support: Research · Data Entry & Organization · Documentation · Report Preparation · Project Coordination · Task Tracking · Stakeholder Communication · Process Documentation · Quality Checking · Data Validation · Information Management · Customer Support · AI-Assisted Productivity

TOOLS: Jira · GitHub · Microsoft Office · Google Workspace · Xray · Visual Studio Code · MySQL · MongoDB · Playwright · AI / Generative AI Tools

PROFESSIONAL EXPERIENCE

Software Quality Engineer | Concentrix

October 2025–October 2026

- Prepared and maintained documentation related to testing activities, issues, release readiness, and project status.
- Reviewed requirements, user stories, and acceptance criteria to identify gaps and clarify expected workflows.
- Prepared QA and release reports summarizing activities, findings, risks, and recommendations.
- Tracked issues and follow-up activities in Jira while coordinating with developers and Product stakeholders.
- Performed data validation using MySQL and MongoDB to verify information accuracy and system results.
- Used AI-assisted tools to support research, documentation, analysis, and workflow improvement.

Product Manager | Concentrix

October 2023–October 2025

- Coordinated product and project activities across business stakeholders, developers, QA, and end users.
- Translated business needs into organized requirements, user stories, documentation, and actionable tasks.
- Managed priorities, backlog activities, timelines, deliverables, and release coordination.
- Tracked project progress, risks, dependencies, and action items and communicated updates to stakeholders.
- Prepared and maintained product documentation, process information, and project materials.
- Gathered stakeholder information, clarified requirements, and followed up on open questions and activities.

Product Subject Matter Expert | Concentrix

September 2021–October 2023

- Served as a product and business-process resource for an NLP-based training roleplay application.
- Supported stakeholders and technical teams by clarifying product information, workflows, and expected behavior.
- Performed UAT and functional validation against requirements and business workflows.

- Collected and analyzed user feedback to identify functional gaps, usability concerns, and improvement opportunities.
- Documented issues, observations, and recommendations and communicated findings to relevant teams.

User Acceptance Tester | Concentrix

January 2020–September 2021

- Conducted end-to-end UAT based on business requirements and real-world operational workflows.
- Created and maintained structured UAT scenarios, documentation, and validation results.
- Reviewed requirements and scenarios to identify gaps and missing business use cases.
- Documented issues and communicated findings to QA, development, and business stakeholders.
- Organized information from multiple sources to evaluate system behavior against business requirements.

Quality Evaluator | Concentrix *October 2015–January 2020*

- Reviewed customer interactions against established quality standards, policies, and performance requirements.
- Analyzed interaction data to identify recurring issues, trends, and process improvement opportunities.
- Prepared quality reports and communicated findings and recommendations to team leaders.
- Maintained accurate records and documentation related to quality evaluations and performance observations.

Customer Service Representative | Concentrix *October 2014–October 2015*

- Assisted customers with account, product, and service-related concerns through structured problem-solving and professional communication.
- Investigated issues, gathered relevant information, and coordinated escalations when necessary.
- Maintained accurate customer records and documented interactions to support issue resolution.

Graphic Artist | Ask Team Tech Update *January 2013–October 2014*

- Created digital graphics, layouts, and visual materials for marketing and communication purposes.
- Managed multiple creative tasks while incorporating feedback and meeting project requirements and deadlines.
